Rome, NY 13440

Mr. Mark Domenico,

A package for the above project located on 7900-7902 Turin Road in the City of Rome has been prepared for a Planned Development overlay district. A pre-application meeting has been held on April 6<sup>th</sup> at the City's offices and we are requesting to have a work session on April 22, 2026 with Common Council prior the scheduled meeting.

The project proposes to construct a private residential community. The proposed community is comprised of 6 – 6-unit patio homes, 34 duplex residences, and 6-single family residences which will be supported by access drives, ADA compliant parking, and community amenities. The project proposes to tie into existing sewer and existing water provided by the City of Rome with extensions on the new roadways. Each residential lot will have the option to be owned by the residents, and the community will be maintained with a Homeowners Association. The following is included in the submission package.

- Application for Planned Development
- Full Environmental Assessment Form – Part 1, 2 and 3

- (a) A planned development is subject to the underlying district regulations unless an exception is specifically granted. As part of the application, a schedule must be included that describes proposed exceptions to any zoning regulations. This schedule must cite, by section number, each regulation from which an exception is sought. The planning board may recommend and the common council may grant exceptions to the zoning district use and dimensional regulations where a planned development is located. Exceptions from district regulations may be granted for planned developments, if the common council finds that such exceptions:
- i. Enhance the overall merit of the planned development.
  - ii. Promote the objectives of both the city and the development.
  - iii. Enhance the quality of the design of the structures and the site plan.
  - iv. Enable the development to offer environmental and pedestrian amenities.
  - v. Will not cause such an adverse impact on neighboring properties so as to outweigh the benefits of the development.
  - vi. Are compatible with adopted land use policies.
  - vii. Provide a public benefit to the city, as described below.
- (b) The underlying zoning district requirements apply, unless an exception is granted as part of the planned development approval. To be granted such exceptions, the applicant must demonstrate

superior design and enhanced amenities. In no case may an exception to district regulations be granted unless the applicant demonstrates a substantial benefit to the city. Design characteristics and amenities to be considered in this determination include, but are not limited to, the following:

- i. Community amenities including plazas, malls, formal gardens, places to congregate, outdoor seating, public art, and pedestrian and public transit facilities.
  - ii. Preservation of existing environmental features.
  - iii. Preservation of historic features.
  - iv. Open space and recreational amenities such as:
    - a. Swimming pools.
    - b. Tennis courts.
    - c. Indoor recreational facilities.
    - d. Jogging trails and fitness courses.
    - e. Playgrounds, dog parks, skate parks, and similar recreational features.
    - f. Natural water features and conservation areas.
    - g. Multi-use trails, nature trails, boardwalks, overlooks, landscaped areas with native plantings, which may incorporate water features, such as a detention pond.
  - v. Reduction of impervious surface throughout the development, including techniques such as cluster development and low impact development, and the increased use of pervious paving materials.
  - vi. The use of green building and sustainable development techniques, including LEED or LEED-equivalent certification of structures.
  - vii. Adaptive reuse of existing buildings.
  - viii. Provision of public car and/or bike share facilities.
  - ix. A senior housing set-aside, either rental or for-sale.
  - x. Affordable housing set-asides.
- (c) A planned development is exempt from the platting and procedural requirements of the subdivision ordinance (chapter 68 of the City Code), unless the planned development is a part of a larger ownership and is intended for individual ownership, sale, or public dedication, or if any parcel of land within a planned development is intended for individual ownership, sale, or public dedication, the platting and procedural requirements of the subdivision ordinance and applicable state laws pertaining to the subdivision, and conveyance of land and the preparation of maps apply.

---

**Required Materials to be submitted with application:**

An application for a planned development must be accompanied by the following:

- (a) Application form, provided by the codes enforcement officer, with required fee.
- (b) A plat of survey of the parcel or parcels of land comprising the development. The plat must be drawn to scale showing the actual dimensions of this development, including all parcels or lots within the development. The plat must be drawn in accordance with the recorded plat of such land.

- (d) A site location map drawn to an appropriate scale showing the proposed planned development in relation to surrounding streets and property located within 600 feet in all directions of the development site. The map must indicate the location, height, and land use of all existing buildings and structures immediately adjacent to the development site.
- (e) A site plan drawn to an appropriate scale showing:
  - i. The location, ground area, height, bulk, and approximate dimensions of all existing and proposed buildings and structures within the planned development.

- ii. The general use or uses to be made of such existing and proposed buildings and structures.
  - iii. The dimensions of all perimeter setbacks and the distance between all buildings and structures.
  - iv. The location and dimensions of all pedestrian walkways, driveways, streets, parking and loading facilities, including the number of parking spaces serving each building or land use type and all parking related screening and landscape.
  - v. A lighting plan with the location, height, design, and illumination characteristics of all external lighting fixtures within the development.
  - vi. The location and dimensions of any areas proposed to be conveyed, dedicated or reserved for parks, parkways, playgrounds, school sites, public buildings, or for any other public use.
  - vii. All existing natural features.
- (f) Typical building elevations and schematic design presentations indicating the general architectural character of all proposed buildings and structures.
  - (g) A traffic circulation plan and traffic impact analysis indicating the proposed movement of vehicles, goods, and pedestrians within the planned development, and to and from adjacent streets, and the impact of the proposed planned development upon existing traffic patterns. Such studies must also include an examination of the adequacy of on-site parking facilities, vehicular circulation patterns, and pedestrian access and safety.
  - (h) A preliminary drainage plan indicating the manner in which surface drainage will be controlled and managed, consistent with all city and other governmental jurisdictions, regulations, and requirements.
  - (i) A utilities study indicating the adequacy of the utility systems serving the proposed planned development, including water distribution lines, sanitary sewers, and stormwater drainage facilities.
  - (j) A landscape plan indicating the general character of all proposed landscape, screening and fencing, including all open space areas around buildings and structures.
  - (k) A separate schedule setting forth any proposed exceptions to any regulations. This schedule must cite by section number each regulation from which an exception is sought.
  - (l) Location and dimension of all common open space, and proposed management plan for such common open space. (See subdivision regulations for management plan requirements.)
  - (m) A stormwater management plan.
  - (n) Grading plan.
  - (o) A sign plan.
  - (p) A general narrative of the proposal and how it meets the standards for a planned development.
  - (q) Proposed easements, covenants and restrictions, if any.
  - (r) A phasing plan, if applicable.
  - (s) The applicant must furnish the city with a performance bond or other acceptable surety approved by the city corporation counsel, guaranteeing installation of specified public improvements and landscape.

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Project :

Date :

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

***Full Environmental Assessment Form***  
***Part 3 - Evaluation of the Magnitude and Importance of Project Impacts***  
***and***  
***Determination of Significance***

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:             Type 1                       Unlisted

Identify portions of EAF completed for this Project:    Part 1             Part 2             Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
